

**THE WIDOWS' AND ORPHANS' PENSION  
(AMENDMENT) LAW 1966**

No. 23

1966

I assent,

7th September, 1966

H.S. Norman-Walker,  
Her Majesty's Commissioner.

**A LAW TO AMEND THE WIDOWS' AND ORPHANS' PENSION  
LAW, 1965**

(14th January, 1966)

ENACTED by the Legislature of Bechuanaland.

**Short Title and Commencement.**

1. This Law may be cited as the Widows' and Orphans' (Amendment) Law, 1966, and shall be deemed to have come into operation on the 14th January, 1966.

**Minor Amendments to Law No. 34 of 1965.**

2. The provisions of the Widows' and Orphans' Pension Law, 1965 (hereinafter referred to as the principal law) specified in the first column of the First Schedule are amended to the extent set out opposite thereto in the second column of the said Schedule.

**Replacement of Appendices I and II of Law No. 34 of 1965.**

3. Appendices I and II to the principal law are replaced by the Appendices set out in the Second Schedule.

**Amendment to Appendix III of Law No. 34 of 1965.**

4. Appendix III to the principal law is amended by the deletion of Tables A, B and C.

**FIRST SCHEDULE**

(Section 2)

| <i>First Column<br/>Section of Principal<br/>law</i> | <i>Second Column<br/>Amendment</i>  |
|--|---|
| 3 (12)   | for "1(1)" substitute "2(1)";   |
| 10 (3)   | for "instalment" substitute "instalments";  |
| 17, in the heading thereof                           | delete "Pensionable";   |
| 18, in the heading thereof                           | insert "Pensionable" before "Public Service";   |
| 24 (c)   | delete "and" where it occurs for the first time;  |
| 26 (3)   | for "1965" substitute "1956";   |
| 30   | for "he" substitute "they";   |
| 33, in the heading thereof                           | for "1959" substitute "1949";   |
| 39   | delete "Nothing in the proviso shall affect the provisions of section 11(3) of this Law." |

**SECOND SCHEDULE**

(Section 3)

**" APPENDIX I**

**PENSION TABLES**

Table A —

The yearly pension, payable by monthly instalments, which a single payment of 1 will secure.

Table B —

The yearly pension, payable by monthly instalments, which a yearly contribution of 1, payable by monthly instalments, until the attainment of age 55 will secure.

Table C —

The single payment which will secure a yearly pension of 1, payable by monthly instalments.

TABLE A  
The yearly pension, payable by monthly instalments, which a single payment of 1 will secure

| Age of husband last birthday | Age of wife last birthday |      |      |      |      |      |      |      |      |      |      |      |
|------------------------------|---------------------------|------|------|------|------|------|------|------|------|------|------|------|
|                              | 20                        | 25   | 30   | 35   | 40   | 45   | 50   | 55   | 60   | 65   | 70   | 75   |
| 20                           | .431                      | .490 | .575 | .680 | .820 |      |      |      |      |      |      |      |
| 1                            | .410                      | .465 | .543 | .646 | .781 |      |      |      |      |      |      |      |
| 2                            | .391                      | .442 | .515 | .613 | .746 |      |      |      |      |      |      |      |
| 3                            | .372                      | .420 | .490 | .585 | .714 |      |      |      |      |      |      |      |

## APPENDIX II

### A. Contributor who commenced to contribute while a bachelor.

#### 1. First Wife's Prospective Pension.

The registered pension to be recorded on marriage is found by adding together the two amounts calculated in accordance with the following rules I (a) and I (b) respectively.

(a) Pension in consideration of the contributions paid during bachelorhood.

**RULE I (a) —** Accumulate the contributions at 3½ per centum compound interest with yearly rests at 31st December and multiply the result by the quantity found from Table A corresponding to the relative ages last birthday of the husband and wife at the date of marriage.

The product gives the registered pension on account of the contributions paid during bachelorhood.

(b) Pension in consideration of the annual contribution current at the date of marriage.

**RULE I (b) —** Multiply the amount of the current annual contribution by the quantity found from Table B corresponding to the respective ages last birthday of the husband and the wife at the date of marriage.

The product gives the registered pension on account of the annual contribution current at the date of marriage.

#### EXAMPLE.

Officer born on ..... 4th May, 1934  
 Officer commenced to contribute on ... 1st September, 1959  
 Officer married on ..... 31st March, 1962  
 Wife born on ..... 5th September, 1935  
 Officer's age at last birthday at date  
 of marriage ..... 27  
 Wife's age last birthday at date of  
 marriage ..... 26

Quantity found from Table A —

Wife — Aged 26 last birthday )  
Husband — Aged 27 last birthday ) .355

Then the registered pension in consideration  
of contributions paid during bachelorhood

$$= .355 \times R441.92$$

$$= R156.88$$

|  | <i>Officer</i> | <i>Government</i> | <i>Total</i> |
|--|----------------|-------------------|--------------|
|  | <i>R</i>       | <i>R</i>          | <i>R</i>     |
| Annual rate of contribution<br>current at date of marriage | 100            | 80                | 180          |

Quantity found from Table B —

Wife — Aged 26 last birthday )  
Husband — Aged 27 last birthday ) 6.10

Then the registered pension in consideration of  
annual contribution current at marriage

$$= 6.10 \times R180$$

$$= R1098.00$$

Total registered pension recorded on marriage of the bachelor —

By Rule I (a) ..... R156.88

By Rule I (b) ..... R1098.00  
R1254.88

(c) Variations of pension consequent on increments to and decrements from the current annual contribution while the contributor is married to his first wife.

RULE I (c) — Multiply the amount of the increment to or the decrement from the current annual contribution by the quantity found from Table B corresponding to the respective ages last birthday of the husband and wife at the date of the variation of the contribution.

The product gives the amount to be added to the registered pension consequent on the increment to the current annual contribution, or as the case may be, the amount to be deducted from the registered pension consequent on the decrement from the current annual contribution

The cessation of the contribution, from any cause other than death, before the completion of the full period of contribution must be regarded as a decrement from the current annual contribution equal to the amount of such current annual contribution.

**EXAMPLE**

Assume particulars as in example subjoined to Rules I(a) and I(b).  
 Annual contribution increased on  
 1st April 1965

*II Second and Subsequent Wife's Prospective Pension.*

(a) Variations of pension consequent on increments to and decrement from the current annual contribution while the contributor is a widower.

RULE II (a) — Assume that the contributor's last preceding wife was alive at the date of the variation of the contribution, and proceed in accordance with Rule I (c).

EXAMPLE OF THE APPLICATION OF RULE II (a) — If the particulars be as in the example subjoined to Rule I (c) except that the first wife, who was born on 5th September, 1935 died on 7th July, 1965, it would be assumed that the contributor was, at the date of the two latter variations of the contribution, married to a wife who was born on the 5th September, 1935. The calculations will then be identical with those given in the example subjoined to Rule I (c).

(b) Variations of pension consequent on the remarriage of the contributor.

If the second or subsequent wife was, at the date of the re-marriage, of the same age last birthday as the last preceding wife would have been had she survived to that date, the registered pension remains the same.

RULE II (b) — If the second or subsequent wife was, at the date of the re-marriage, of a less or greater age than the last preceding wife would have been had she survived to that date, multiply the amount of the registered pension by the quantity found from Table C corresponding to the age last birthday of the husband at the date of re-marriage, and the age last birthday which the last preceding wife would have attained had she survived to that date; multiply the product so obtained by the quantity found from Table A corresponding to the respective ages of the husband and of the second or subsequent wife at the date of re-marriage.

The result gives the registered pension to be recorded on the re-marriage of the contributor.

**EXAMPLE.**

Assume particulars as in the example subjoined to Rule I (c) —

|  |                    |
|--|--------------------|
| First wife died on .....                                     | 7th July, 1965     |

| Registered pension in consideration of<br>annual contribution current at com-<br>mencement of contribution ..... |                | 2.34 x R198             |                    |
|  |                | = <u>R463.32</u>        |                    |

(b) Variations of pension consequent on increments to and decrements from the current annual contribution while the contributor is married to his first wife.

**RULE III (b) —** Proceed as in Rule I (c).

**IV. Second and Subsequent Wife's Prospective Pension**

(a) Variations of pension consequent on increments to and decrements from the current annual contributions while the contributor is a widower.

**RULE IV (a) —** Proceed as in Rule II (a).

(b) Variations of pension consequent on the re-marriage of a contributor.

**RULE IV (b) —** Proceed as in Rule II (b).

(c) Variations of pension consequent on increments to and decrements from the current annual contribution while the contributor is married to his second or subsequent wife.

**RULE IV (c) —** Proceed as in Rule I (c).

**C. Contributor who commenced to contribute while a widower.**

*V. Prospective Pension to Children by his First Marriage.*

So long as a contributor's children by his first marriage are eligible for pension, a pension must be registered on their behalf. If there are no such children, the widower should be treated as if he was a bachelor.

**RULE V** — For the purpose of calculating the registered pension of the children, assume that the deceased wife lived until the date of commencement of contribution and died immediately afterwards, and proceed in accordance with Rules III (a) and (b).

*VI. Second and Subsequent's Wife's Prospective Pension.*

**RULE VI** — For the purpose of calculating the registered pension of the wife, assume that the deceased wife survived to the date of commencement of contribution and died immediately afterwards; then proceed in accordance with Rules applicable to the case of Officers who commenced to contribute while married (See B).

**D. Contributor with two or more beneficiaries.**

**RULE VII** — Where there are children eligible for pension by two or more deceased wives, or where there is a wife and also children eligible for pension by one or more previous marriages, the pension of each beneficiary as found by the above Rules must be divided by the total number of beneficiaries then existing in order to find the registered pension of that beneficiary.

**E. Calculation of quantities (or tabular results) for ages not given in the tables.**

The wife's age in the Tables is given in quinquennial intervals only. Ages of husbands and wives younger than the youngest or older than the oldest given are to be dealt with as if identical with the youngest and oldest respectively.

For the intermediate ages of wives, interpolate by exact fifths.

**EXAMPLES**

(a) To find the quantity in Table A corresponding to the ages of a husband and wife aged 27 and 26 last birthday : —

The quantity for ages 27 and 25 given in Table A is .344

The quantity for ages 27 and 30 given in Table A is .400

The addition of five years to the age of the wife results, therefore, in an addition of .056 to the quantity given in the tables for ages 27 and 25. An addition of one year to the age of the wife accordingly results by proportion in an addition of one-fifth of .056 to the quantity given in the Table for ages 27 and 25.

One-fifth of  $.056 = 011$ . This figure added to  $.344$  gives  $.355$ ;  $.355$  is, therefore, the required quantity corresponding to ages 27 and 26.

The addition shall not be extended to more than three decimal places. In the example above the extension would be  $.011$  (2) for 1 year,  $.022$  (4) for 2 years,  $.033$ (6) for 3 years,  $.044$ (8) for 4 years. Therefore the interpolation factor for a wife aged 26 would be  $.011$ , for 27 -  $.022$ , for 28 -  $.034$  and for 29 -  $.045$ , the third decimal place for each year being influenced by the value of the fourth decimal place.

(b) Similarly the quantity found from Table B corresponding to the ages of a husband and wife aged respectively 39 and 38 last birthday is three-fifths of  $.55$  added to  $2.84$  which gives  $3.17$ .

(c) In the case of Table C, it must be noted that an addition to the age of the wife results in a deduction from the quantity given in the Table.

To find the quantity in Table C corresponding to the ages of a husband and wife aged respectively 35 and 34 last birthday.

The quantity for ages 35 and 30 given in Table C is  $3.83$ .

The quantity for ages 35 and 35 given in Table C is  $3.29$ .

The addition of five years to the age of the wife results, therefore, in a deduction of  $.54$  from the quantity given in the Table for ages 35 and 30. An addition of four years to the age of the wife accordingly results, by proportion, in a deduction of four-fifths of  $.54$  from the quantity given in the Table for ages 35 and 30.

Four-fifths of  $.54 = .43$  (2). This figure deducted from  $3.83$  leaves  $3.40$ .  $3.40$  is, therefore, the required quantity corresponding to ages 35 and 34.

For Tables B and C interpolation should be taken to two decimal places, the second figure being influenced by the value of the third."

Passed by the Legislative Assembly this day,

the 23rd August, 1966.

G T. MATENGE,  
Clerk of the Legislative Assembly.
